

2025 Taylorsville City Amateur Radio Club Weekly check in Net script.

Good evening. This is (ID/your Call Sign) _____)
and I will be acting as net controller for the Taylorsville Amateur Radio Club, KT7ARC. We extend our appreciation to the owners and operators of this repeater system for allowing us to use these frequencies for our net. **Should there be an emergency during the net, please use the phrase BREAK-BREAK to conduct your emergency traffic.**

This is a directed net. To improve efficiency in our net procedure, please listen carefully to the net instructions as our procedure has changed. It is important for you to be on frequency at the start of the net (2030 hours local) and remain for the duration of the net unless an “early out” is requested and granted.

Our member check in list is organized by districts, with each district sorted alphabetically by call sign suffix letters. Net control may call the districts in any order so please pay attention.

Net control will call your suffix letters only. You only need to respond with your full call sign (no phonetics unless requested by net control) as we already know your name and location. This will allow us to move rapidly through the district lists. Net control will acknowledge you by your first name. If you have traffic, please indicate by saying the word “traffic” after you give your call sign.

We will have an “informal chat” portion after the net roll call. Indicate your desire to participate in the informal chat net, with a Yes or No. We will only call those indicating “Yes” for that portion. We invite all to listen, even if not actively participating. This is an opportunity to learn from others and share experiences.

If there are guests who are monitoring this repeater, please feel free to check in when the call goes out for guests; please give us your call sign, name & location.

We will now proceed with roll call.

- >Call Districts by suffix, members respond with full call sign.
- >Call for late or missed roster members, Please respond with your full call sign.
- >Call for any Guests to check in. Please give us your Call sign, Name, & location.

- >Go to Club Members Traffic, Announcements, & Training – if any.
- >Make a final call for late or missed stations.

>Release those not participating in the “informal” portion and move to calling those desiring to participate in “informals”.

Thank you for your participation in the net. **This is (ID/ your Call Sign) _____** closing the net for the Taylorsville Amateur Radio Club, KT7ARC, at (time _____) local time. **73 to all.**
